

SKOPJE, NORTH-
MACEDONIA

27-29. MAY 2025

DIGITYROMA NEWSLETTER

We are delighted to announce that our project is successfully coming to an end. The project will officially end in August 2025, but of course the goal was to create products that will serve the future and can be used later on, providing tools not only for the Roma community, but also for educators and organizations to continue to support Roma integration.

The third partner meeting of the project took place in Skopje. The aim of the three-day meeting was to test the completed Manual (training material) and to transfer its content. The purpose of the training material is to provide adult Roma with important knowledge on the subject of digital storytelling.

THE MAIN TOPICS OF THE MANUAL

Digital
storytelling

Creating
script

Using visual
multimedia

Using sound

Ethical and
Legal
Constraints

Publishing
and sharing a
story

The long-term goal is to make as many people in the Roma community as possible aware that they can use digital storytelling to make their voices heard, raise important issues and questions, and achieve their goals by asserting their interests.
